

We are looking for...

Software Developer - full stack (f/m/x)

ANNEA.ai GmbH

Hamburg, Germany / Lisbon, Portugal / Full-Remote is possible

WHO WE ARE

We are ANNEA.ai, a young company based in Hamburg, Germany and in Lisbon, Portugal. We are an international team of engineers, computer scientists, experts in Internet of Things (IoT) and artificial intelligence - with many years of experience, and a strong background in engineering.

Our vision is to save resources for a more sustainable planet. Therefore, we defined our mission to make machinery more efficient through predictive maintenance. Here we focus primarily on renewable energy generation.

We offer end- to-end software-solutions for automated condition-based predictive maintenance for renewable energies. Based on profound domain knowledge, advanced machine learning and sophisticated IoT-techniques we predict future problems in the machines to make renewable energy more competitive to conventional energy generation.

YOUR RESPONSIBILITIES

- Design, build, scale and maintain software solutions and IoT platforms
- Implementation of ML/AI pipelines and integration in the backend systems (among others for applications in IoT)
- Optimizing performance of data pipelines and algorithms
- Creating and managing complex enterprise application architectures
- Work closely with data. scientists, product designers, frontend and backend engineers.
- Provide technical leadership, guiding junior team members. Help to grow and develop the front-end and back-end teams
- Help shaping the technical areas of the product

YOUR QUALIFICATIONS

- Degree in computer science / informatics or a comparable qualification with work experience
- Minimum 2 years of experience as a software developer (full stack)
- Experience in working with modern backend and frontend technologies and tools (Java, Docker, Kubernetes, AWS, GraphQL or similar, Typescript, .NET frameworks)
- Motivation to find new solutions and create cutting-edge technological applications
- Good knowledge with languages such as C, C++, Python, Java, Java Script
- Basic knowledge of git and JIRA
- Ability to work on different platforms (Windows, Linux, Unix, Mac OS X)
- Proven record of creating complex enterprise application architectures
- Experience working in an agile environment
- Good communication skills and ability to work in cross-funktional teams

WE OFFER

- Full-time / part-time / freelance possible
- Strong focus on R&D
- Freedom to develop & implement your own ideas and learn new things
- A fast-paced, dynamic environment with flat hierarchies in which you can put your skills to the test
- The opportunity to become part of a young team that is redefining the Renewable Energy market
- Offices in the heart of Hamburg and Lisbon
- Remote work possible
